THE AUSTRALIAN SCIENCE TEACHERS JOURNAL

Index to Volume 34 (1,2,3, and 4), 1988
(Issues 108,109,110,111)

FEATURE ARTICLES	ISSUES	PAGE
A guide to Australia's chemical history. I.D. Rae	109	62
Agricultural education in Australia - an historical perspective K. Lindesay	109	95
Art, science and technology in Australia's future P. Ellyard	109	22
Astronomy education in Australia C.L. Smith	109	100
Australian biology - a glimpse at the past L. Gillbank	109	56
Biological education: A Western Australian perspective P. McMillan	109	106
Cognitive outcomes of road safety education: The RTA Driver Unit P.L. Gardner	108	9
Cognitive outcomes of road safety education: The RTA Vehicle Unit P.L. Gardner	110	23
Computer management of science faculty resources: Using an Apple IIe or IIc, or compatible, and "Appleworks" P. Langton	110	14
Early influences in Australian physics education L.D. Mackay	109	120
Early influences in the teaching and learning of chemistry, sometimes erroneously called chemical education M. Bishop	109	110
Experimenting with assessment: The practical examination in HSC biology revisited N. Hargraves & P. Lynch	108	30
General science and the community of science teaching R. Fawns	109	80
Geological education - a perspective I. Clark & B. Cook	109	117
Habitat correlated variation in plant species: Theoretical basis and practical approaches for teaching A.W. Scott	110	9
Investigations of exemplary practice in Australian science classes K. Tobin & B.J. Fraser	108	23
Is conceptual conflict a viable teaching strategy? B. Hand	111	22
Learning science at specialised hands-on science centres J. Griffiths	111	35
Learning science in Australia in the nineteenth century I.R. Wilkinson	109	76
Pseudoscience: a means to teaching scientific methods A. Wheeler	111	15

Reproductive Technology - IVF research in Australia - relating science, technology and society in the classroom B. Walsh 111 8
Schemata: Implications for science teaching R.W. Howard 110 29
Science in Aboriginal Australia P.R. Bindon 109 16
Science achievement in Australia in an international context M.J. Rosier 108 13
Secondary science teachers' role perceptions in science education R. Lazorowitz & Y. Carmi 111 27
The Australian science facilities program: 1964 - 1975 J. Ainley 109 89
The Australian Science Teachers' Associations: Historical notes about each affiliated association and ASTA R.W. Stanhope 109 4
The contribution of the Australian Academy of Science to science education in Australia R. Dircks 109 84
The contributions of women to the development of Australian science and technology H. Burfitt 109 31
The myth of the lucky country: Science and technology's role in Australia's development R. Eckersley 109 38
The role science and technology has played in Australia's 200 years of European development J.R. deLaeter 109 9
200 years of agriculture in Australia D. Tribe 109 44
200 years of astronomy in Australia S.C.B. Gascoigne 109 53
200 years of Australian geology D.F. Branagon 109 66
200 years of physics in Australia J. Jenkin 109 71
What Australians think of science and technology and the future R. Eckersley 110 19

JUNIOR SCIENCE NOTES

A model black hole J. Allbeury 108 47
A solar system model P. Joslin 111 45
A tissue issue M. Pearce 111 47
Casting a little light on some candle experiments S. Stocklmayer 110 39
City parking - No fees! In fact you could be paid in the most surprising way C.B. Mackie 111 44
Chemistry word puzzle J. Ireland 110 37
Communication with the deaf G. Griffiths 110 35

Keeping ourselves warm
M. Pearce 110 40
Practical chemistry test
P. Collins 108 49
Resin embedding: Where did I go wrong?
S. Yeo & M. Peters 108 43

BIOLOGY NOTES

How to use a decision tree and patterns of inheritance to solve genetics problems M. Hackling 108 53
Microbes 'n' schools: How many micro-organisms are there in soil?
E. Gough 108 51
Microbes 'n' schools: Will micro-organisms decompose all materials?
E. Gough 110 48
Microbes 'n' schools: Marine microbial ecology:
Decomposition of seagrass E. Gough 111 52
Microbes 'n' schools: Ice-nucleation activity of a bacterium present on plant surfaces E. Gough 111 53
Pulling the wool over their eyes: A model for teaching mitosis and meiosis J. Sheehan 111 49
The inter-relationship sheet - A simple way to understand more about the surroundings A. Gibson & M. Slocombe 110 43
The little Aussie battler
A. Gibson 110 46
Using shopping trolleys for estimating population size
G. Manton 108 55

CHEMISTRY

A chemistry toy: Let there be light
N.E.Austin 111 57
Making chemistry accessible
G. Hargreaves 110 54
Photochemistry in school science (part I)
J. Gipps 110 50
Photochemistry in school science (part II)
J. Gipps 111 55
Preparation of a simple and effective demonstration - type electrochemical cell K. Bunker 108 57
Questions, questions,...
R. Schibeci 108 58
The digital top loading balance: Demonstration of reaction rate factors
C. Heinzman 111 57

EARTH SCIENCE

An instuctional unit for teaching the structure of silicate minerals
N. Austen 111 60

Geological mapping exercise
L. Stephens & G. Pike 108 61
Sediment: A resource for teaching science skills
G. Pike 110 55

PHYSICS

A physics toy - the Lerence Pendulum
N.E. Austen 111 66
An electromagnet pile driver
A. McCheyne 111 65
Astronomy: A teaching resource
Y.F. Phillips 110 60
Demonstration of the value of earthing appliances
K. Bunker 110 63
Determination of Planck's constant
S. Adams 111 62
Measuring the density of air
K. Bunker 111 65
Kepler's laws and the oribits of earth satellites
K. Peterson 108 71
Polarisation and plastics
N.E. Austen 110 69
Systematic errors in measuring 'g'
K. Bunker 108 75
The top loading digital balance
C. Heinzman 110 66

RESEARCH

The development and application of three science related
life-skills tests J. Clarke 110 71
The meaning of Technology: Perceptions from the essays of
Year 8 teachers L. Rennie & F. Sillitlo 111 68
Variables influencing student attitudes to science homework tasks
R. Beresford & K. Tobin 108 77

SCIENTIST'S VIEWPOINT

Sir Alan Walsh 110 81
Professor Don Watts 108 86
